

Localised scrub clearance to allow planting enhancements for biodiversity value. Scrub clearance works to be carried out manually and in accordance with BS5837:2012

Localised scrub clearance to allow planting enhancements for biodiversity value. Scrub clearance works to be carried out manually and in accordance with BS5837:2012

**Key**

- Root Protection Area of trees and vegetation to be retained. Existing levels to be as far as possible within RPA of existing trees. Please refer to tree protection specification clauses for details of excavations within root protection area
- Trees and vegetation to be removed
- Trees for removal as a result of the development
- Tree Protective Fencing to BS 5837:2012
- Existing fence / property boundary

Plan to be read in conjunction with following documents:

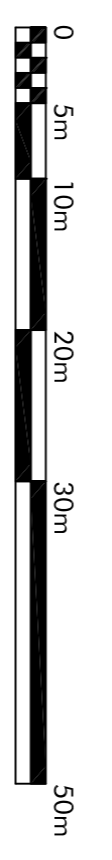

Tree Survey, Arboricultural Impact Assessment, Arboricultural Method Statement and Tree Protection Plan in accordance with BS5837: 2012 prepared by Hoydens Arboricultural Consultants

Survey of Schedule 9 Listed Invasive Weed Species prepared by Elcor Environmental

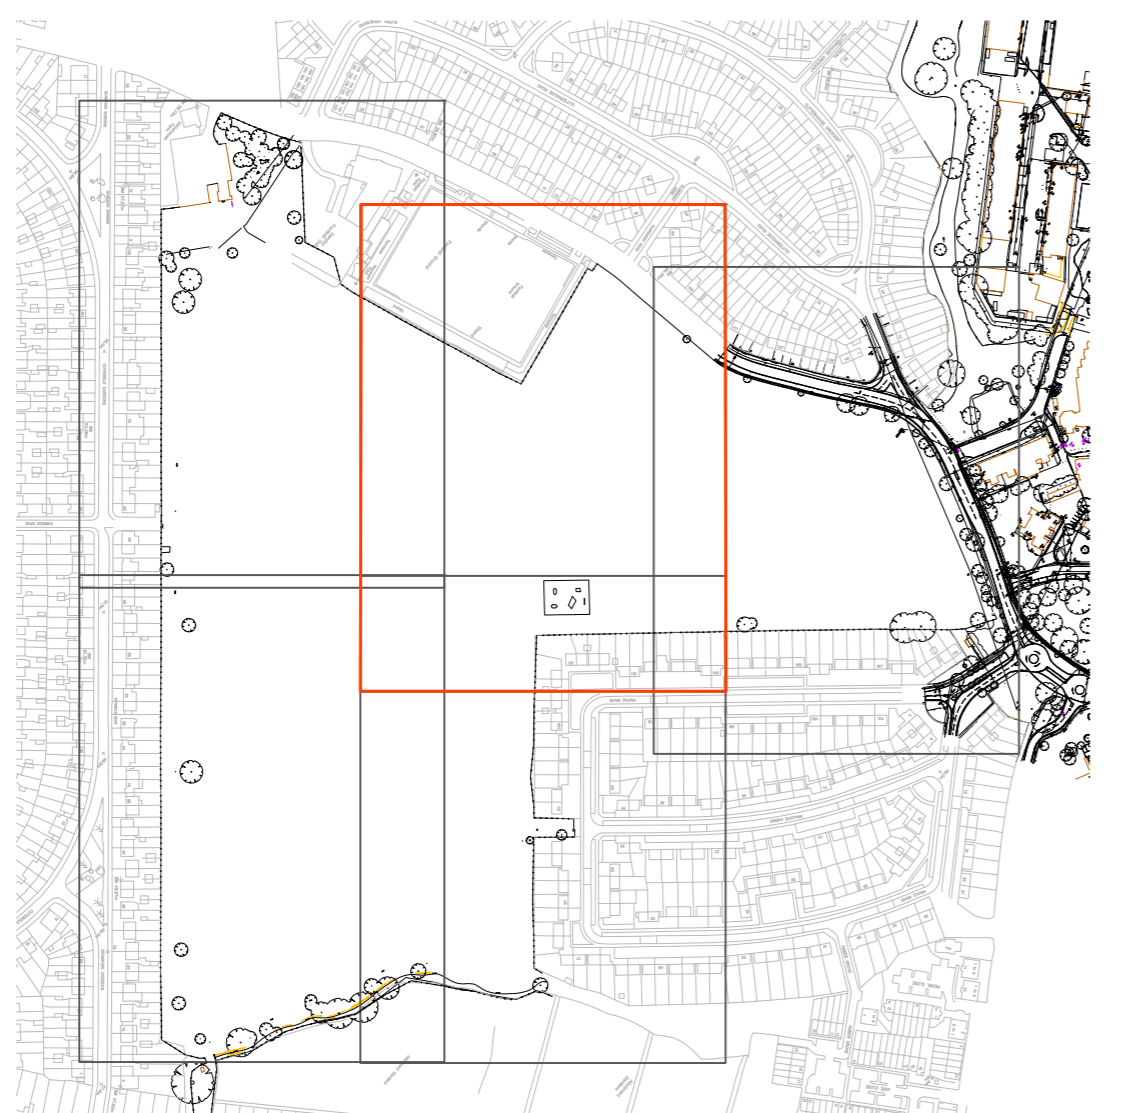

All tree works should adhere to current best practice detailed within BS 5837: 2012 (Trees in relation to design, demolition and construction - recommendations)

For removal of existing trees within tree protective fencing areas and / or within Root Protection Areas of other trees, refer to Hoydens Arboricultural Consultants' document listed above

For proposed level information refer to CHPF Proposed Site Levels Drawing 1065-08-012
